

## SIMTROL MANAGES THE 21<sup>ST</sup> CENTURY CLASSROOM

Computers. Projectors. Interactive whiteboards. Document cameras. DVD players. VCRs. Printers. Digital displays. A large – and growing – collection of devices is being used in today’s technology-rich classrooms to enhance student achievement. How much more effective would educators be if they could easily and cost-effectively manage these disparate technologies from a unified platform?

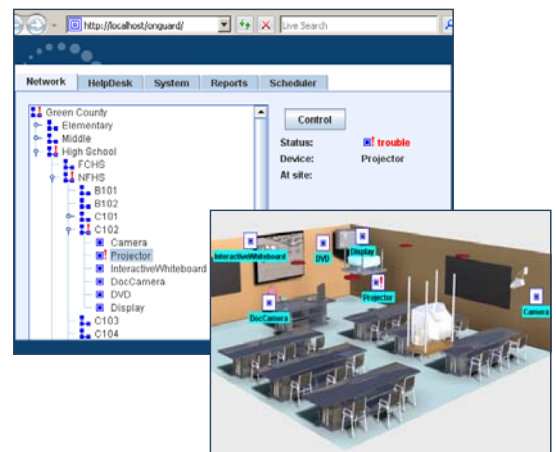

Introducing Simtrol’s solution for the 21<sup>st</sup> Century Classroom. This state-of-the-art software simplifies the lives of instructional leaders, school administrators, and teachers by seamlessly integrating classroom devices into a scalable, affordable platform that simplifies the management and use of classroom technology.

### FOR INSTRUCTIONAL & PROFESSIONAL DEVELOPMENT LEADERS

- **Gain visibility into technology usage** to optimize instructional strategies and tactics.
- **Ensure that classroom technology supports the educational mission** by correlating technology usage with student achievement.

### FOR SCHOOL ADMINISTRATORS

- **Reduce energy consumption and extend asset life** by intelligently scheduling equipment to be turned off when not in use and to be optimized when it is being used.
- **Lower operating and maintenance costs** by remotely diagnosing and troubleshooting issues with classroom equipment, reducing the number of “in person” visits and the size of maintenance teams.

### FOR TEACHERS

- **Eliminate remote controls** by controlling all classroom equipment from easy-to-use panels on the computer or interactive whiteboard. No more lost remotes to search for or batteries to replace!
- **Enhance the teaching environment and simplify mastery of new classroom technology** by easily integrating multiple classroom devices into teaching methods.
