

Simtrol

Simtrol Visitor™

Part of Simtrol's Suite of Telejustice Solutions

Simtrol Visitor is a **software-based video visitation system** that **connects, records, monitors, and manages jail visitations**. Visitor may be deployed **standalone** or may be **integrated** with other criminal justice products, such as Jail Management Systems.

Key Benefits

Improved Safety

Visitors are safely separated from prisoners.

Enhanced Productivity

Elimination of movement in and out of secure areas eliminates need for physical screening and frees staff for other priority tasks.

Zero Contraband

Separate physical locations prevent the passing of contraband between visitors and inmates.

Record Evidence

Record all visits, or only selected visits of interest. Initiate recording from within software application.

Simplicity

The visitation process is streamlined and simplified for both visitors and jail staff.

Greater Access

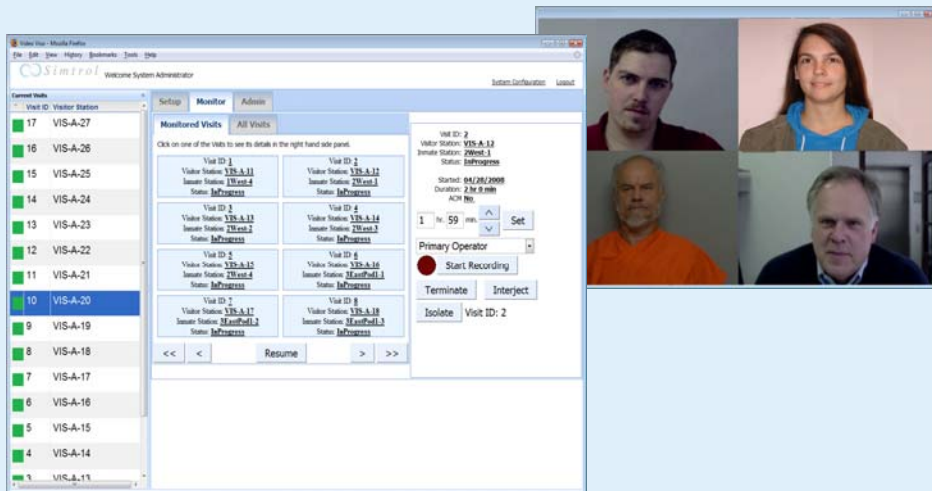

Minors not allowed inside the jail facility can visit remotely from outside locations.

Higher Throughput

Facilitate more visitations than possible with physical visitation rooms.

Minimized Equipment Maintenance

Proactive monitoring and remote troubleshooting of devices ensure maximum uptime and minimize maintenance expense.

Key Features

Operator Dashboard

- Schedule and manage visitation sessions
- Monitor live grid of video visitations
- Isolate sessions of interest
- Record all or selected sessions
- Interject instructions to participants
- Extend or reduce visit durations in real time
- Manually terminate visits in response to disturbances

Flexibility

Manage visits from any browser on the IT network.

Session Automation

Establish and terminate sessions automatically per schedule.

Configurability

Assign user roles and configure permissions for each.

Platform Compatibility

Designed to work on any standards-compliant Java Web Application Server and Relational Database Management Server.

SOA Interfaces

Capable of interfacing with jail management systems using Service Oriented Architecture.

Diagnostics

Monitor devices 24/7 with local or remote control and troubleshooting tools using Simtrol's advanced Device Management Software.
